Copy-ready executive Copilot prompts

C776 · v1.0 · 1 October 2026

Use these in an approved Microsoft 365 work account. Attach or paste only the synthetic source pack. Workflows may require Frontier access and features vary by tenant. If a feature is unavailable, use these prompts as an offline design and test framework; label the result simulated.

NS-01 — Choose a service outcome

```
Help me complete a Microsoft 365 Copilot business task. I am reviewing service response baseline and customer feedback. Use only the attached Northstar Service source pack, particularly NS-01. Use Microsoft 365 Copilot Chat to identify a bounded opportunity. Draft pilot opportunity statement for a leadership audience. Show the source behind every material claim, label assumptions, surface the strongest counterargument, and state what the human decision owner must verify. Apply this decision gate: Sponsor confirms outcome and owner. Do not invent figures or claim that a simulated action was deployed.
```

NS-02 — Ask a useful question

```
Help me complete a Microsoft 365 Copilot business task. I am reviewing a vague request to improve service. Use only the attached Northstar Service source pack, particularly NS-02. Add audience, task, source, constraints and output to a Copilot prompt. Draft reusable work prompt for a leadership audience. Show the source behind every material claim, label assumptions, surface the strongest counterargument, and state what the human decision owner must verify. Apply this decision gate: Manager confirms the prompt answers the real question. Do not invent figures or claim that a simulated action was deployed.
```

NS-03 — Ground a chat answer

```
Help me complete a Microsoft 365 Copilot business task. I am reviewing current service policy and two case notes. Use only the attached Northstar Service source pack, particularly NS-03. Ask Copilot Chat to answer from the supplied source. Draft sourced response summary for a leadership audience. Show the source behind every material claim, label assumptions, surface the strongest counterargument, and state what the human decision owner must verify. Apply this decision gate: Check every material statement against the source. Do not invent figures or claim that a simulated action was deployed.
```

NS-04 — Compare options in Chat

```
Help me complete a Microsoft 365 Copilot business task. I am reviewing three possible pilot processes. Use only the attached Northstar Service source pack, particularly NS-04. Ask Copilot for benefits, trade-offs and missing evidence. Draft option comparison for a leadership audience. Show the source behind every material claim, label assumptions, surface the strongest counterargument, and state what the human decision owner must verify. Apply this decision gate: Use the same criteria for all options. Do not invent figures or claim that a simulated action was deployed.
```

NS-05 — Share a Copilot Page

```
Help me complete a Microsoft 365 Copilot business task. I am reviewing a reviewed team decision summary. Use only the attached Northstar Service source pack, particularly NS-05. Move approved ideas into a Copilot Page or offline shared brief. Draft shared planning page for a leadership audience. Show the source behind every material claim, label assumptions, surface the strongest counterargument, and state what the human decision owner must verify. Apply this decision gate: Owner checks content and access before sharing. Do not invent figures or claim that a simulated action was deployed.
```
