Copy-ready executive Copilot prompts

C776 · v1.0 · 1 October 2026

Use these in an approved Microsoft 365 work account. Attach or paste only the synthetic source pack. Workflows may require Frontier access and features vary by tenant. If a feature is unavailable, use these prompts as an offline design and test framework; label the result simulated.

NS-16 — Spot a repeatable handoff

```
Help me complete a Microsoft 365 Copilot business task. I am reviewing synthetic email requests and missed deadlines. Use only the attached Northstar Service source pack, particularly NS-16. Describe a Microsoft 365 Copilot Workflows opportunity in plain language. Draft workflow opportunity card for a leadership audience. Show the source behind every material claim, label assumptions, surface the strongest counterargument, and state what the human decision owner must verify. Apply this decision gate: Process owner confirms a repeatable trigger. Do not invent figures or claim that a simulated action was deployed.
```

NS-17 — Define trigger and result

```
Help me complete a Microsoft 365 Copilot business task. I am reviewing service request email with fictional fields. Use only the attached Northstar Service source pack, particularly NS-17. Ask Workflows to draft trigger, steps and intended output. Draft trigger-to-result map for a leadership audience. Show the source behind every material claim, label assumptions, surface the strongest counterargument, and state what the human decision owner must verify. Apply this decision gate: Owner verifies trigger is precise. Do not invent figures or claim that a simulated action was deployed.
```

NS-18 — Add review step

```
Help me complete a Microsoft 365 Copilot business task. I am reviewing draft acknowledgement and case summary. Use only the attached Northstar Service source pack, particularly NS-18. Ask Workflows to route draft for human approval. Draft human review gate for a leadership audience. Show the source behind every material claim, label assumptions, surface the strongest counterargument, and state what the human decision owner must verify. Apply this decision gate: No external commitment before approval. Do not invent figures or claim that a simulated action was deployed.
```

NS-19 — Test exceptions

```
Help me complete a Microsoft 365 Copilot business task. I am reviewing missing case owner and contradictory priority. Use only the attached Northstar Service source pack, particularly NS-19. Test workflow with normal and exception examples. Draft test and exception log for a leadership audience. Show the source behind every material claim, label assumptions, surface the strongest counterargument, and state what the human decision owner must verify. Apply this decision gate: Hold unknown owner or conflicting input. Do not invent figures or claim that a simulated action was deployed.
```

NS-20 — Decide to activate

```
Help me complete a Microsoft 365 Copilot business task. I am reviewing workflow test record and accountable owner. Use only the attached Northstar Service source pack, particularly NS-20. Review Workflows draft, permissions and run history before enabling. Draft go or hold record for a leadership audience. Show the source behind every material claim, label assumptions, surface the strongest counterargument, and state what the human decision owner must verify. Apply this decision gate: Owner approves live activation in authorised tenant. Do not invent figures or claim that a simulated action was deployed.
```
