Copy-ready executive Copilot prompts

C776 · v1.0 · 1 October 2026

Use these in an approved Microsoft 365 work account. Attach or paste only the synthetic source pack. Workflows may require Frontier access and features vary by tenant. If a feature is unavailable, use these prompts as an offline design and test framework; label the result simulated.

NS-26 — Choose agent purpose

```
Help me complete a Microsoft 365 Copilot business task. I am reviewing recurring employee policy questions. Use only the attached Northstar Service source pack, particularly NS-26. Define one bounded use for Copilot Agent Builder. Draft agent purpose statement for a leadership audience. Show the source behind every material claim, label assumptions, surface the strongest counterargument, and state what the human decision owner must verify. Apply this decision gate: Owner excludes high-impact decisions. Do not invent figures or claim that a simulated action was deployed.
```

NS-27 — Write instructions

```
Help me complete a Microsoft 365 Copilot business task. I am reviewing approved policy excerpts and role statement. Use only the attached Northstar Service source pack, particularly NS-27. Describe audience, task, boundaries and escalation in Agent Builder. Draft agent instructions draft for a leadership audience. Show the source behind every material claim, label assumptions, surface the strongest counterargument, and state what the human decision owner must verify. Apply this decision gate: Owner checks failure and escalation wording. Do not invent figures or claim that a simulated action was deployed.
```

NS-28 — Add knowledge

```
Help me complete a Microsoft 365 Copilot business task. I am reviewing current synthetic policy files. Use only the attached Northstar Service source pack, particularly NS-28. Attach approved knowledge sources in Agent Builder. Draft knowledge-source register for a leadership audience. Show the source behind every material claim, label assumptions, surface the strongest counterargument, and state what the human decision owner must verify. Apply this decision gate: Data owner validates permissions and versions. Do not invent figures or claim that a simulated action was deployed.
```

NS-29 — Create starter prompts

```
Help me complete a Microsoft 365 Copilot business task. I am reviewing three common user questions. Use only the attached Northstar Service source pack, particularly NS-29. Write clear starter prompts for the agent. Draft starter prompt set for a leadership audience. Show the source behind every material claim, label assumptions, surface the strongest counterargument, and state what the human decision owner must verify. Apply this decision gate: Business user can understand each prompt. Do not invent figures or claim that a simulated action was deployed.
```

NS-30 — Preview a response

```
Help me complete a Microsoft 365 Copilot business task. I am reviewing typical policy question with source answer. Use only the attached Northstar Service source pack, particularly NS-30. Test the agent preview and compare to source. Draft agent response review for a leadership audience. Show the source behind every material claim, label assumptions, surface the strongest counterargument, and state what the human decision owner must verify. Apply this decision gate: Owner verifies accuracy and citation. Do not invent figures or claim that a simulated action was deployed.
```
