# Copy-ready executive Copilot prompts

C776 · v1.0 · 1 October 2026

Use these in an approved Microsoft 365 work account. Attach or paste only the synthetic source pack. Workflows may require Frontier access and features vary by tenant. If a feature is unavailable, use these prompts as an offline design and test framework; label the result simulated.

## NS-31 — Test a normal question

```
Help me complete a Microsoft 365 Copilot business task. I am reviewing approved leave-policy
example. Use only the attached Northstar Service source pack, particularly NS-31. Ask the agent for
a bounded answer. Draft normal-case test record for a leadership audience. Show the source behind
every material claim, label assumptions, surface the strongest counterargument, and state what the
human decision owner must verify. Apply this decision gate: Answer matches current source. Do not
invent figures or claim that a simulated action was deployed.
```

## NS-32 — Test missing knowledge

```
Help me complete a Microsoft 365 Copilot business task. I am reviewing question outside approved
policy set. Use only the attached Northstar Service source pack, particularly NS-32. Ask the agent
to state uncertainty and escalation. Draft out-of-scope test record for a leadership audience. Show
the source behind every material claim, label assumptions, surface the strongest counterargument,
and state what the human decision owner must verify. Apply this decision gate: Agent hands off
unknown answer. Do not invent figures or claim that a simulated action was deployed.
```

## NS-33 — Test conflicting sources

```
Help me complete a Microsoft 365 Copilot business task. I am reviewing current and retired
synthetic policies. Use only the attached Northstar Service source pack, particularly NS-33.
Challenge the agent with contradictory evidence. Draft conflict test record for a leadership
audience. Show the source behind every material claim, label assumptions, surface the strongest
counterargument, and state what the human decision owner must verify. Apply this decision gate:
Owner chooses authoritative source. Do not invent figures or claim that a simulated action was
deployed.
```

## NS-34 — Pilot with users

```
Help me complete a Microsoft 365 Copilot business task. I am reviewing three synthetic role
personas. Use only the attached Northstar Service source pack, particularly NS-34. Run a small
acceptance review before sharing. Draft pilot feedback log for a leadership audience. Show the
source behind every material claim, label assumptions, surface the strongest counterargument, and
state what the human decision owner must verify. Apply this decision gate: Address material
failures before release. Do not invent figures or claim that a simulated action was deployed.
```

## NS-35 — Share and monitor

```
Help me complete a Microsoft 365 Copilot business task. I am reviewing approved agent and audience
list. Use only the attached Northstar Service source pack, particularly NS-35. Review Agent Builder
sharing and ongoing feedback plan. Draft agent release and review card for a leadership audience.
Show the source behind every material claim, label assumptions, surface the strongest
counterargument, and state what the human decision owner must verify. Apply this decision gate:
Owner checks audience and knowledge access. Do not invent figures or claim that a simulated action
was deployed.
```
