Copy-ready executive Copilot prompts

C776 · v1.0 · 1 October 2026

Use these in an approved Microsoft 365 work account. Attach or paste only the synthetic source pack. Workflows may require Frontier access and features vary by tenant. If a feature is unavailable, use these prompts as an offline design and test framework; label the result simulated.

NS-46 — Prioritize use cases

```
Help me complete a Microsoft 365 Copilot business task. I am reviewing five candidate copilot opportunities. Use only the attached Northstar Service source pack, particularly NS-46. Rank outcome, readiness, risk and owner. Draft opportunity portfolio for a leadership audience. Show the source behind every material claim, label assumptions, surface the strongest counterargument, and state what the human decision owner must verify. Apply this decision gate: Reject ownerless opportunity. Do not invent figures or claim that a simulated action was deployed.
```

NS-47 — Design ninety days

```
Help me complete a Microsoft 365 Copilot business task. I am reviewing pilot observations and manager capacity. Use only the attached Northstar Service source pack, particularly NS-47. Sequence chat, workflow and agent waves. Draft ninety-day roadmap for a leadership audience. Show the source behind every material claim, label assumptions, surface the strongest counterargument, and state what the human decision owner must verify. Apply this decision gate: Each wave has owner and gate. Do not invent figures or claim that a simulated action was deployed.
```

NS-48 — Tell the board

```
Help me complete a Microsoft 365 Copilot business task. I am reviewing verified pilot outcome and open risks. Use only the attached Northstar Service source pack, particularly NS-48. Use Copilot in PowerPoint to draft a board update. Draft board scorecard for a leadership audience. Show the source behind every material claim, label assumptions, surface the strongest counterargument, and state what the human decision owner must verify. Apply this decision gate: Every claim has source and date. Do not invent figures or claim that a simulated action was deployed.
```

NS-49 — Challenge the case

```
Help me complete a Microsoft 365 Copilot business task. I am reviewing a confident recommendation and downside scenario. Use only the attached Northstar Service source pack, particularly NS-49. Ask Copilot Chat for counterarguments. Draft decision challenge log for a leadership audience. Show the source behind every material claim, label assumptions, surface the strongest counterargument, and state what the human decision owner must verify. Apply this decision gate: Executive answers strongest objection. Do not invent figures or claim that a simulated action was deployed.
```

NS-50 — Make the call

```
Help me complete a Microsoft 365 Copilot business task. I am reviewing portfolio, roadmap and scorecard. Use only the attached Northstar Service source pack, particularly NS-50. Record the sponsor go, hold or stop decision. Draft signed transformation decision for a leadership audience. Show the source behind every material claim, label assumptions, surface the strongest counterargument, and state what the human decision owner must verify. Apply this decision gate: Owner names next review date. Do not invent figures or claim that a simulated action was deployed.
```
